

Alpa

- ★ The Physical Realm
- ★ The 'process of life'
determines the

Alpa is NOT

If Alpha is not Only

$$\star \neg(a \wedge b) = \neg a \vee \neg b$$

$$\star \neg(a \vee b) = \neg a \wedge \neg b$$

$$\overline{A \cup B} = \overline{A} \cap \overline{B}$$

But if we live in the best of all possible Worlds

Augustus De Morgan

Augustus De Morgan (1806-1871)

Leibniz.

- Due to Morgan
- The best of All Worlds = tbw
- The worst of all Worlds = tww
- Not tbw = tww ????
- Given Only tbw & tww =>
- NOT A and B is NOT A OR NOT B
- Starting from the right that means
- IF WE DONT LIFE IN THE WORST of ALL Worlds OR The best AT the same time
- Than is there NO WORLD in the which both can exist !!! its either A or B focusing on the „tertium non datur“

$$\neg(a \wedge b) = \neg a \vee \neg b$$

$$\neg(a \vee b) = \neg a \wedge \neg b$$

- For the first equation
- Yet in an boolean only dualistic logic the right side will equal zero
- The term NOT the best and the worst points towards :
- What else ??? the world didn't cease to exist by reading this
- The second equation is thus the PROOF that there is a logic
- Except a or b that is already because it must be something
- Otherwise the equation meant $0=0$ which is true and trivial

$$\neg(a \wedge b) = \neg a \vee \neg b$$

$$\neg(a \vee b) = \neg a \wedge \neg b$$

- What did Leibniz intend to say ???
- I don't know but the negation of his statement would lead to non-existence, how can the world not exist whilst we experience something.
- The focus must lie on the attribute 'best'
- Describing our world in 'Amounts' and
- Quality

- This could mean the 'upperst' coming from the French word meilleur , best or upperst pointing towards believe of 'the Efficiency' on a level underlaying the World as we percive it , religious or not .
- => first the difference between Efficiency and Effectivness

- Mathematical speaking one can only compare amounts that have elements in common
- Leibniz believed in a 'realm' of our world
- In which there is no difference in quality in terms of effective and efficiency
- Just Excellence
- => summing up we 'live' in a world that does
- Incorporate elements of the 'realm' of excellence
- Leaving the question if we 'exist' in this realm

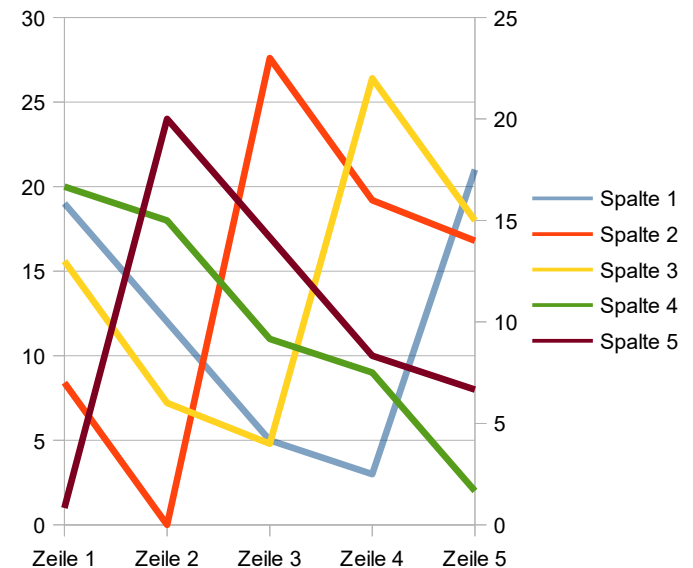

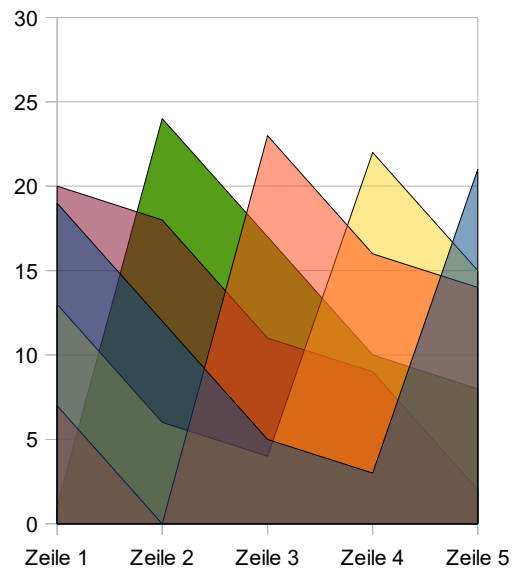

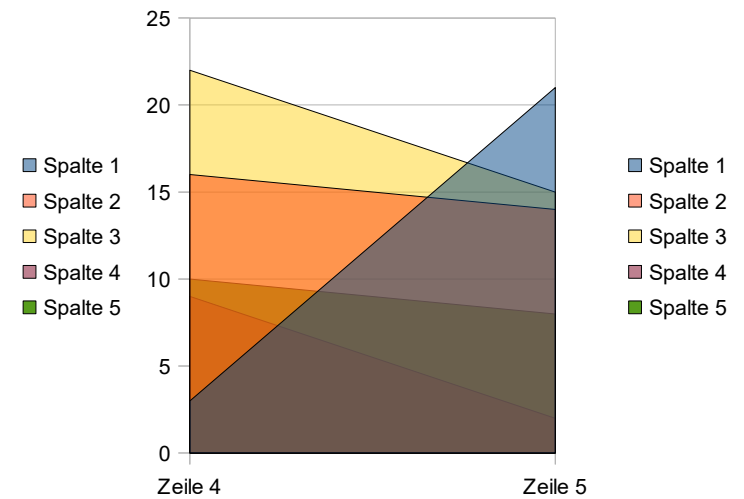

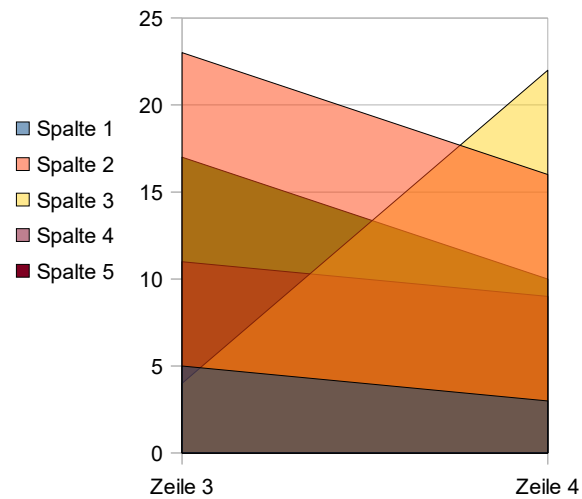

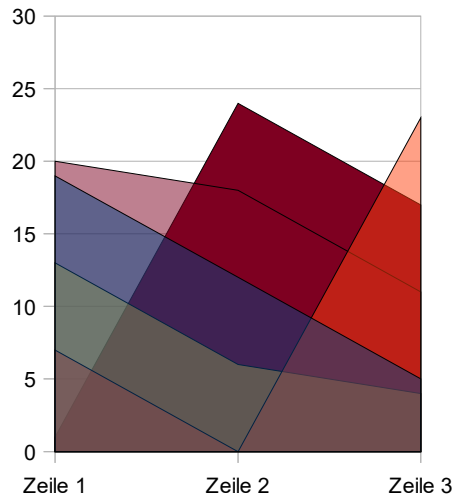

- Deducting from this :

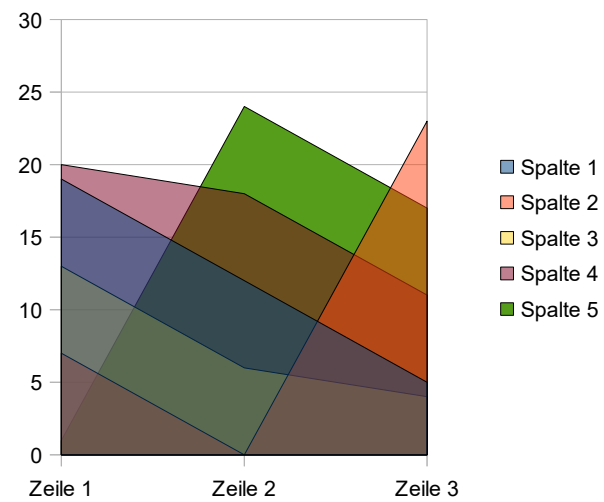

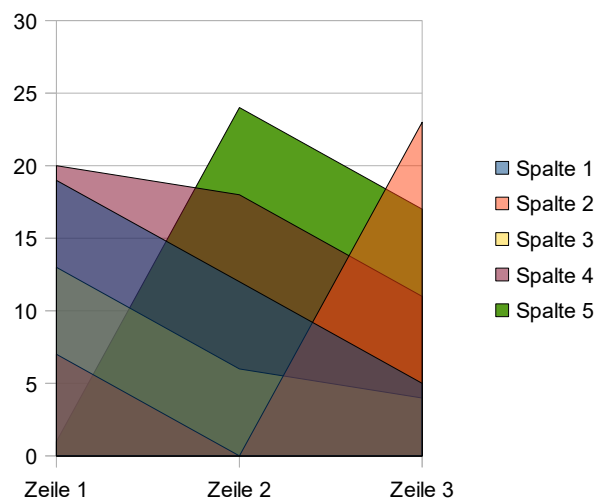

If there is only arestoelican Logic ' best' ' worst ' 'A or B' are the terms to use to describe our world.

- Anyone who suspecting Black and white cathégorries would call Leipnitz 'optimistic'
- Yet the 'best' underlines the fact that the best needed to be added for other human in order to get a grasp of Leipnitz idea
- Calling Leipnitz 'optimist' is either an atheists view OR ignoring the realm of 'excellence'
- yet there is a level in which we exist (not live) that does NOT make this destinction.

Beta
The process of life
'we live'

Visualise five periodic Functions

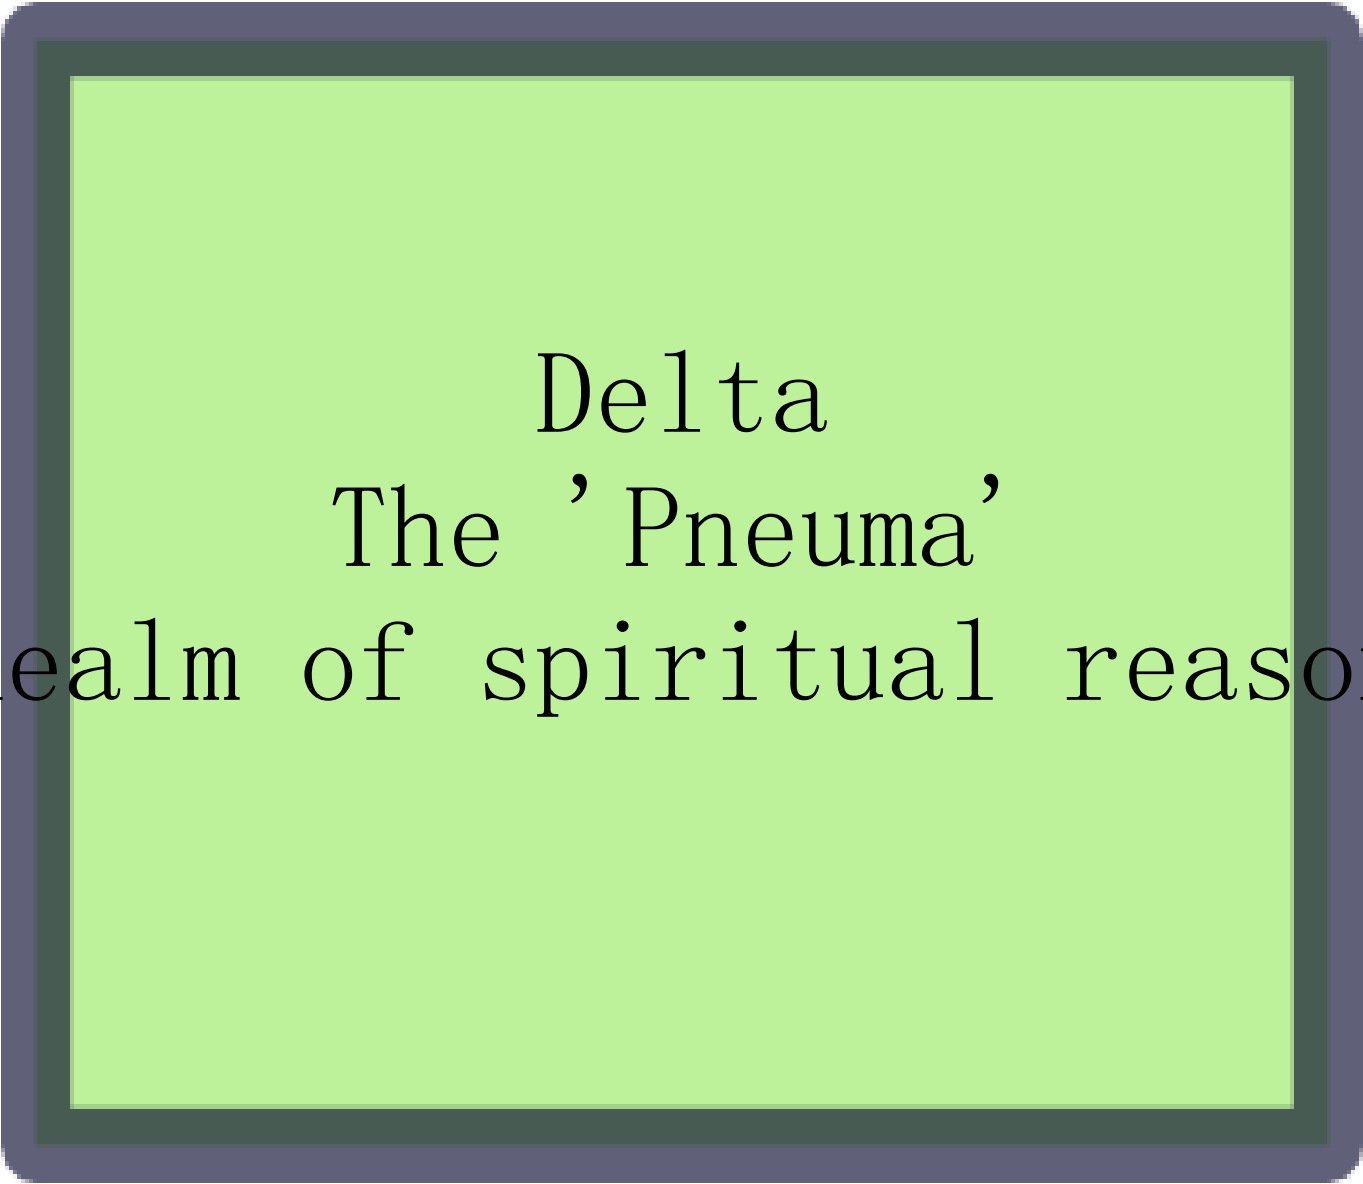

- Beta can not be described entirely through Mathematics because of the inherent logic that is underlaying BETA
- A Non-aresthotelican logic
- Organizational Raising potential
the ability to create new forms and shapes
in the realm of 'Physis'
- BETA gives direction to Alpha

Gamma
The 'Phsyche'

- Gamma gives meaning to the schema of Information
- Posing already an Interpretation

Delta
The 'Pneuma'
Realm of spiritual reason
